

O que será exibido no console quando o método **main()** for executado?

```
public abstract class C {
    public int v1=10,v2=20;
    public static int s1=30;

    public C() {
        v1*=2;
        v2*=2;
        s1+=10;
    }

    public static void ms1(int a) {
        s1+=a;
    }

    public int retorna(int b) {
        return v1+v2+s1+calcula(b);
    }

    public int calcula(int b) {
        return 2*b;
    }

    public abstract int executa(int b);
}

public class C1 extends C {
    public C1() {
        v1=v2=10;
        s1+=10;
    }

    public static void ms1(int a) {
        s1+=2*a;
    }

    public int calcula(int b) {
        return b+10;
    }

    public int executa(int b) {
        ms1(b);
        return retorna(b);
    }
}

public class Main {
    public static void main(String[] args) {
        C v=new C1();

        System.out.println(v.executa(5));
    }
}
```
