INF1636 – Programação Orientada a Objetos Prof. Ivan Mathias Filho Exercício 5.1

O que será exibido no console quando o método main() for executado?

```
public abstract class C {
     public int v1=10, v2=20;
     public static int s1=30;
     public C() {
           v1*=2;
           v2*=2;
           s1+=10;
     public static void ms1(int a) {
         s1+=a;
     public int retorna(int b) {
         return v1+v2+s1+calcula(b);
     }
     public int calcula(int b) {
         return 2*b;
     }
     public abstract int executa(int b);
}
public class C1 extends C {
     public C1() {
          v1=v2=10;
          s1+=10;
     }
     public static void ms1(int a) {
           s1+=2*a;
     public int calcula(int b) {
           return b+10;
     public int executa(int b) {
          ms1(b);
          return retorna(b);
     }
}
public class Main {
     public static void main(String[] args) {
          C v=new C1();
           System.out.println(v.executa(5));
     }
}
```
